

**EXTENDER PATTY FOR HONEY BEES  
(oxytetracycline Type C medicated feed)**

**Caution: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.**

**Indications for Use:** For control of American Foulbrood caused by *Paenibacillus larvae* and European Foulbrood caused by *Melissococcus plutonius* susceptible to oxytetracycline.

**ACTIVE DRUG INGREDIENT**

Oxytetracycline (from oxytetracycline dihydrate base) equivalent to oxytetracycline hydrochloride<sup>a</sup>.....800 mg/patty

**GUARANTEED ANALYSIS**

As required by applicable state law and regulations.

**INGREDIENTS**

Sugar, vegetable shortening

**FEEDING DIRECTIONS**

Place one patty per colony on the top bars of the brood nest frames in a single application.

**Withdrawal Periods and Residue Warnings:** Remove at least 6 weeks prior to main honey flow. Type C medicated feeds should be fed in the spring or fall and consumed by the bees before main honey flow begins to avoid contamination of production honey. Honey stored during medication periods in combs for surplus honey should be removed following final medication of the bee colony and must not be used for human food.

**WARNING:** Do not use in a manner contrary to state apiary laws and regulations. Each state has specific regulations relative to disease control and medications. Contact the appropriate official or state departments of agriculture for specific inter- and intrastate laws and regulations.
