

**SYRUP FOR HONEY BEES
(oxytetracycline Type C medicated feed)**

Caution: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

Indications for Use: For control of American Foulbrood caused by *Paenibacillus larvae* and European Foulbrood caused by *Melissococcus plutonius* susceptible to oxytetracycline.

ACTIVE DRUG INGREDIENT

Oxytetracycline (from oxytetracycline dihydrate base) equivalent to oxytetracycline hydrochloride^a.....200 mg/5 lb syrup

GUARANTEED ANALYSIS

As required by applicable state law and regulations.

INGREDIENTS

Sugar

FEEDING DIRECTIONS

Feed 5 lb of syrup (200 mg oxytetracycline) per colony every 4 to 5 days for a total of 3 applications. Bulk feed the syrup using feeder pails, or division board feeders, or by filling the combs. Prepare fresh syrup for each application.

Withdrawal Periods and Residue Warnings: Remove at least 6 weeks prior to main honey flow. Type C medicated feeds should be fed in the spring or fall and consumed by the bees before main honey flow begins to avoid contamination of production honey. Honey stored during medication periods in combs for surplus honey should be removed following final medication of the bee colony and must not be used for human food.

WARNING: Do not use in a manner contrary to state apiary laws and regulations. Each state has specific regulations relative to disease control and medications. Contact the appropriate official or state departments of agriculture for specific inter- and intrastate laws and regulations.
