

CircoGard[®]

Porcine Circovirus Vaccine, Type 2b, Killed Baculovirus Vector

Product Description

- One-dose porcine circovirus (PCV) Type 2b vaccine for vaccination of swine
- Inactivated trivalent-adjuvanted formulation using StimGard Plus™ adjuvant
- Each vial contains 50 or 250 doses (1 mL/dose)

Advantages

- Labor-saving 1-mL dose – easy on nursing piglets.
- Safe for use in young animals.
- Demonstrated heterologous circovirus protection.
- 3 different classes of adjuvants in StimGard Plus™ help provide for an optimal immune response.

Dosage / Administration

- Shake well before use. Using aseptic technique, inject a single 1.0-mL dose intramuscularly (IM).

Indications / Uses

- For use in healthy piglets of all breeds, 10 days of age or older, against Porcine Circovirus, Type 2b.
- Visit USDA website for full label indications and technical information. (productdata.aphis.usda.gov).

Precautions

- CAUTION: For animal use only.
- Store at 2 to 8°C (35-45°F). Do not freeze. Shake well before use. Use entire contents upon opening.
- Do not vaccinate within 21 days before slaughter.
- Transient reaction may occur at the injection site. If anaphylaxis occurs, use epinephrine or equivalent. Contains merthiolate (Thimerosal) as a preservative.
- This product has not been tested in pregnant animals.

Packaging

- 50-mL or 250-mL vials.

Ordering Information

- Prod. number:
22010-50 (50 mL)
22010-250 (250 mL)

Key Features

- Pig-proven under field conditions.
- StimGard Plus™ trivalent adjuvant system helps optimize both cell-mediated and humoral immune responses.
- Excellent syringeability.
- Advanced purification process allows low-volume injection for minimal tissue reaction.
- QR (quick response) codes on the label for inventory and tracking purposes.

The labeling contains complete use information, including cautions and warnings. Always read, understand and follow the labeling and use directions. See the back page for use directions and additional information.
