

# Product Profile

## Pennchlor 90G<sup>®</sup>

### Chlortetracycline Type A Medicated Article

#### Product Description

- Antibacterial premix for oral administration in feed to chickens, turkeys, cattle, swine, and sheep
- Each pound of premix contains 90 grams of chlortetracycline activity

Granular

**CATTLE**  
Now Approved  
with Rumensin<sup>®</sup>

#### Formulation

- Granular free-flowing feed medication.
- Ingredients: Chlortetracycline calcium complex, calcium carbonate, roughage products, mineral oil.

#### FDA Status

- CAUTION: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.
- Type A Medicated Article for use in the manufacture of medicated dry feeds (not for use in liquid feeds).
- Category I drug; does not require a feedmill license.

#### Withdrawal Period

- 0 days for livestock and turkeys.
- 24-hour withdrawal for chickens.
- Different withdrawal times may be required for certain export markets.

#### Indications (Partial List, See Back)

- Chickens: Control of infectious synovitis (*Mycoplasma synoviae*); control of chronic respiratory disease (CRD) and air sac infection

(*Mycoplasma gallisepticum*, *Escherichia coli*); reduction of mortality due to *E. coli*.

- Turkeys: Control of infectious synovitis (*M. synoviae*); control of hexamitiasis (*Hexamita meleagrides*); reduction of mortality due to paratyphoid (*Salmonella typhimurium*); control of complicating bacteria associated with bluecomb (transmissible enteritis, coronaviral enteritis).
- Cattle: For the reduction of the incidence of liver abscesses; treatment and control of bacterial pneumonia (*Pasteurella* spp.); treatment of bacterial enteritis (*E. coli*); control of active infection of anaplasmosis (*Anaplasma marginale*).
- Swine: Treatment of bacterial enteritis (*E. coli*, *Salmonella choleraesuis*) and bacterial pneumonia (*Pasteurella multocida*); control of leptospirosis (*Leptospira pomona*); reducing the incidence of jowl abscesses (Group E streptococci).

#### Packaging

- 50-lb, purple color-coded bags.

## Key Features

- Tried and trusted, cost-effective treatment option vs injectable therapy.
- Broad spectrum, effective against both Gram-positive and Gram-negative organisms that can cause respiratory, enteric, or reproductive diseases.
- Readily absorbed, providing effective blood and lung tissue concentrations.
- Versatile, with combination approvals including\*: Deccox<sup>®</sup> (cattle), Rumensin<sup>®</sup> (cattle), BioCox<sup>®</sup> (chicken), Coban<sup>®</sup> (chicken), Denagard<sup>®</sup> (swine), BMD<sup>®</sup> (swine)
- Granular formulation promotes consistent mixing with less dust.
- High-quality manufacturing at US Pharmgate facilities according to FDA requirements.
- Color-coded bag for easy identification.

\*See Bluebird labels for details.

The labeling contains complete use information, including any cautions and warnings. Always read, understand and follow the labeling and use directions. See the reverse side for use directions and additional information.
